

KLEENGUARD* A20 Breathable Particle Protection Apparel

- Lightweight and breathable, made of patented MICROFORCE* Barrier SMS Fabric that offers barrier protection from submicron size particles as small as 0.26 micrometers
- Garments provide protection from fine dusts, fibers and light liquid sprays
- White Coveralls and Labcoat are ideal for maintenance, general clean-up, food processing, pharmaceuticals, electronics, manufacturing, asbestos, lead and mold abatement and laboratories
- All have patented REFLEX* Design, which is 7½ times less likely to rip out vs. coveralls sewn to ANSI minimum sizing
- Coveralls packaged 24 per case
- Labcoats packaged 25 per case
- Both sold individually
