

## 150 mm Gas Proportioner

Proportioner/Multitube

FLOWMETERS

**Description:** Airgas® gas proportioners are designed for blending bases in an exact ratio. The gases are piped into individual connections and, after passing through the tubes, are mixed in a chamber and exhausted from the unit through a single port.

**NOTE:** Gas proportioner and two tubes are supplied as one unit. To select tubes, see 150 mm flowmeter section.

Specifications
